

Coronavirus Phishing emails

Cybersecurity guidelines in the Covid-19 Era

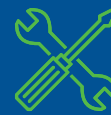

Why are we sending this?

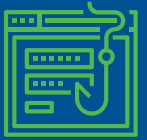

High profile news items are often exploited by hackers

Their aim is to exploit your emotions by offering “knowledge” or “tools”.

Today it's the Corona Virus

What can you do?

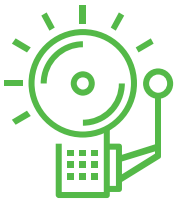

For now, just remember that emails addressing the Corona Virus are mostly a phish.

If you are keen on learning the news, just browse to one of your favorite news channels

Got a message from the WHO?

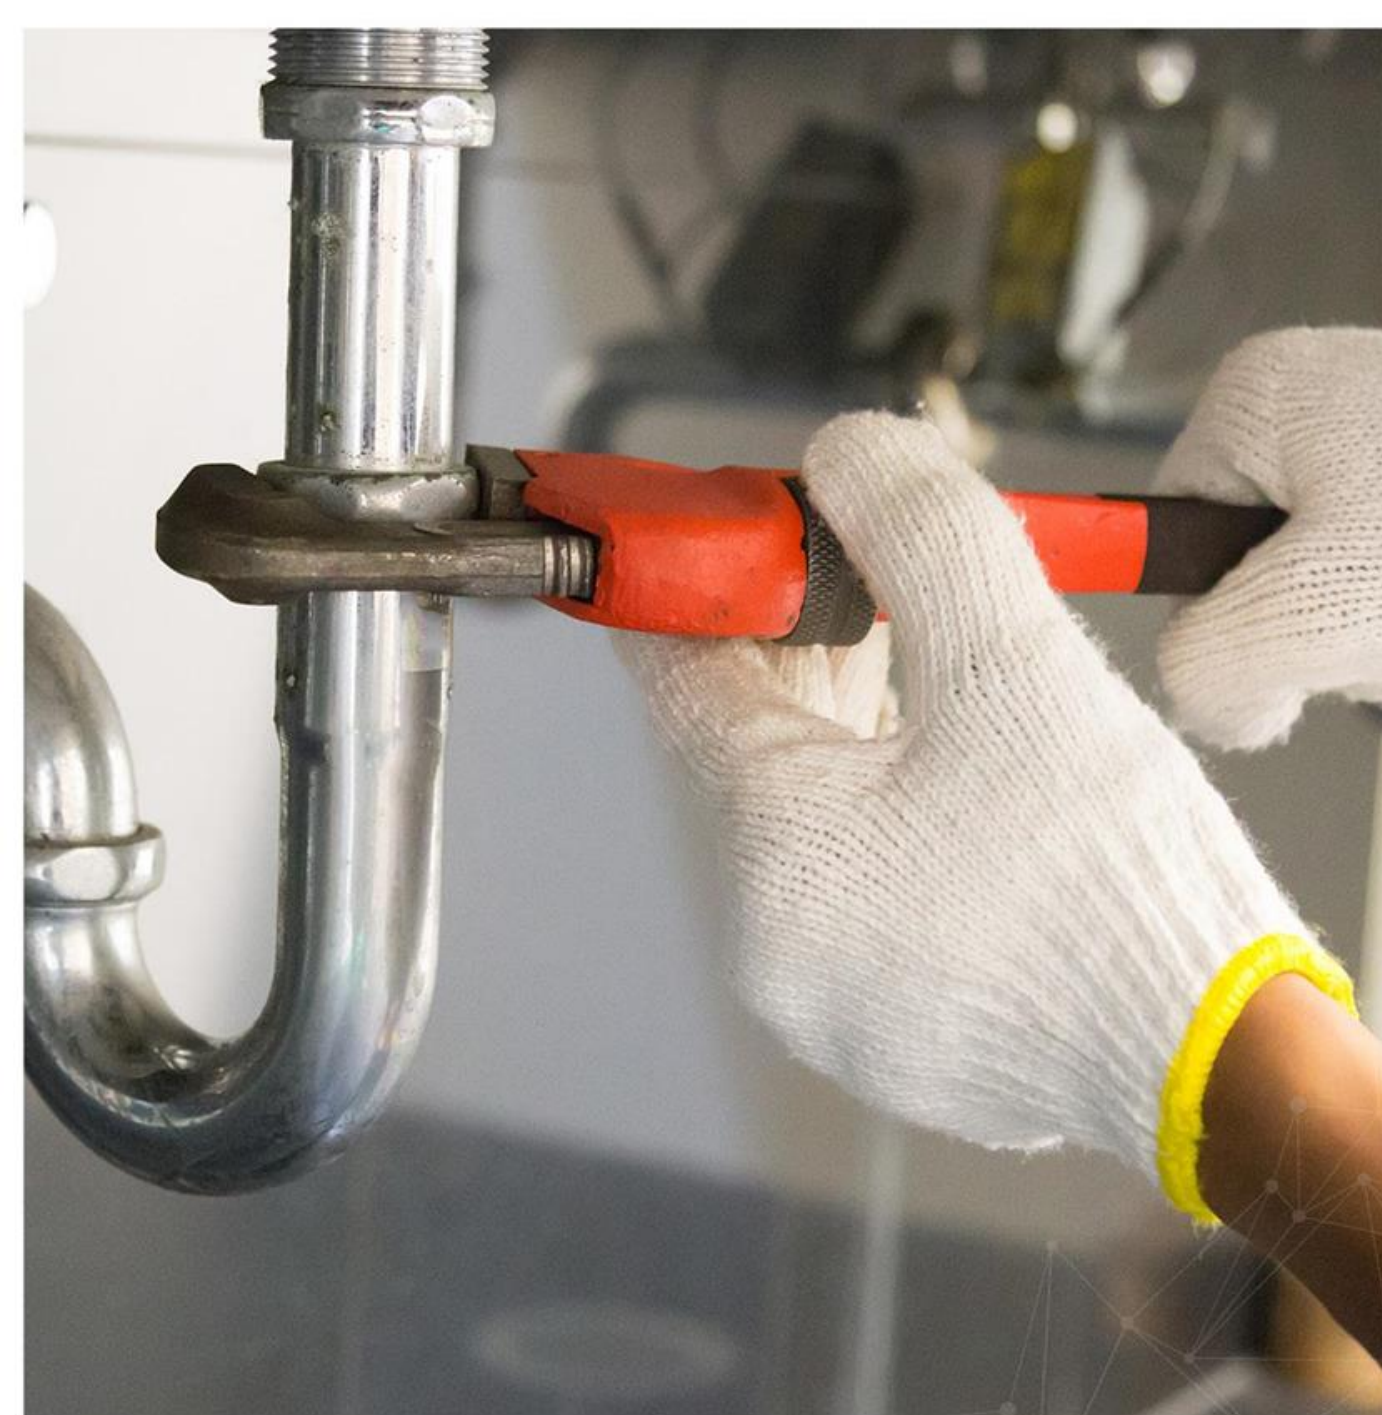

It is most likely a fraudulent email

Brows to the World Health Organization for updates:

www.who.int >

And what if you fell for it...

It's never too late to fix it.
